Applied Chemistry

Department Vision

“ To be a leader in Chemical Engineering Education and Research by providing balanced learning and fostering research to enable the learners to meet the challenges of process industries and societal needs.

Department Mission

1. Share state of the art knowledge and facilities and enable optimal utilization of the resource in the region.

2. To adopt good pedagogical practices and ethics in order to achieve excellence.

3. Develop research culture and create a platform to disseminate research and development.

The Chemical Engineering Department was started in 1996 it offers B.E and M.TECH. Courses in Chemical Engineering. Department was started with 30 students in undergraduate but latter on realizing the importance and need for Chemical Engineers, intake capacity raised to 60 in 2013-14. M.TECH Course was started in 2013-14 with specialization in Chemical Engineering. The Department started with vision developing itself into academic excellence in Chemical Engineering and associated areas in order to develop competitive professionals and experts having knowledge, skills and attitude to serve the society and nation.
